25 February 1971

MEMORANDUM FOR: Chief, Research & Engineering Division, TSG

SUBJECT : Completion and Termination of Contract

[REDACTED]

1. The work performed under this contract improved the operating characteristics of four [REDACTED] Chip Comparators presently in use at NPIC. A fixed-price contract for [REDACTED] was awarded [REDACTED] to improve the design of the optics mount and to install sensors to detect either leakage or evaporation of the coolant required for the high-intensity light source. Period of performance for all work was 4 February 1970 to 8 December 1970.

2. The contractor performed very well and produced a completely satisfactory design and modification to the Chip Viewers thereby transforming four marginal instruments into very satisfactory pieces of equipment. The contractor was entirely responsive to our requests and completed the project in a timely manner. The contractors technical competence is judged to be very good.
